(i) ABOUT

- As a .NET Developer, I focus on developing enterprise-level projects with .NET Core, leveraging Entity Framework and current technologies. I am dedicated to applying SOLID principles to ensure clean code and efficient software design. My expertise includes creating web service projects and integration solutions, as well as utilizing SQL for effective database management and optimization.

I am confident in my ability to learn and am committed to continuous self-improvement. Known for my strong problem-solving skills and sense of responsibility, I strive to perform my job to the best of my ability and find it essential to see how my contributions add value and make a positive impact.

My career goals include continuously developing my skills, advancing in my career, and contributing to valuable projects. I am dedicated to staying updated with the latest technologies and industry trends, aiming to make meaningful contributions and support impactful software solutions.
